## RECYCLED POLYESTER FELT

Our range of eco-friendly materials is now complemented by fine recycled polyester felt. This is another rPET felt in our range of sustainable materials. It is made in Europe from recycled PET bottles and is characterized by excellent quality and beautiful melange colors in line with current trends. Combined with natural recycled leather, it creates the perfect material combination for customers who value sustainability. Certified according to Global Recycled Standard, OEKO-TEX Standard 100 and REACH. #materialsmatter

# RECYCLED LEATHER

## RECYCLED LEATHER

The idea of recycling leather scraps comes from the need to manage a huge amount of leather waste generated in tanneries. Leather scraps are reused in the production cycle by milling and then adding latex and natural fat as binders. It is guaranteed that bonded leather fibre material is made of over 90% natural and re-growing raw materials.

The recycled leather is soft, nice in touch and has the smell of natural leather. It is ideal for: bags, backpacks, vanity cases and other small accessories.

# WASHABLE PAPER

Do you know that production of washable paper is similar to the leather tanning techniques?

Therefore, cellulose fibers gets extraordinary durability, are suitable for washing and sewing. Washable paper is also called a vegan leather.

Series PAPP contains smaller cases for documents, pencil cases, beauty bags, urban or traveling bags mad entirely of washable paper as well as other designs which are felt and washable paper combination.

# RAW FELT

## RAW FELT

For the new collection, which we could call "pure nature", we use 100% natural, not processed, wool felt, in natural off —white shade.

There are four thicknesses of material (2 mm, 3 mm and 4 mm) available. That gives an endless possibilities in the promotional articles production, starting from small accessories through products to the wellness zone and ending with large, comfortable bags.

Raw felt is environmentally friendly, it is a renewable material, and its production is neutral for the climate and our environment.

# FELT + PRESS BOARD

Do you know that pressboard has been introduced to general use by modelers? They had noticed that this hard cardboard is resistant to humidity, the edges do not fray, and the smooth surface is resistant to abrasion and bending.

PRESS series uses pressboard as a decorative element on which the laser engraving looks extraordinary. It is also a usable element which combined with felt stiffens the design in the series.

# cotton

## RAW COTTON

For the production of the COTTON collection, we use raw, unbleached, heavyweight cotton, in natural off-white (ecru) shade, which is an ideal printing background.

The raw cotton, from which the new collection is created, is characterized by extreme durability. At the same time that is very pleasant in touch.

In addition to high aesthetics and wearing comfort, the COTTON collection is not a burden to our environment.

# CRYSTAL CLEAR FOIL

## CRYSTAL CLEAR FOIL

Bags and accessories made of transparent foil have been famous on the catwalks of the top fashion designers as well as on the streets of the great world's metropolises, for several seasons.

Like the real visionaries, we reached for this material in 2012 when designing bags. Now we are presenting the newest, extended collection called CRYSTAL.

crystal PEN BOX / PB-01-F50

# SCUBO FABRIC

## SCUBA fabric (Neopren type)

Do you know that genuine neoprene - a synthetically produced rubber was invented in the 1930s.

Due to its excellent protective and insulating abilities it is used in the production of professional water sports' suits, protective clothing, medicine and orthopedics.

Designing our neoprene collection, we decided to use a soft version of the neoprene, which is known as scuba fabric.

# TYVEK

Do you know that tyvek was invented 50 years ago. In 1982 it was used to print banknotes for the Bank of Haiti. It combines the advantages of foil, paper and fabric. It is ultralight but durable.

Tyvek is 100% recyclable.

#materialsmatter

Tyvek series with UV printing enables ideal reproduction of graphic details and colors.
